\*1 Approximate time until the light source brightness decreases to half of its original value. (Assuming the projector is being used in an environment containing airborne particles of 0.04 mg/m<sup>3</sup> or less. This is an approximate guide only and may change depending on the projector's usage and surroundings.)

\*2 The specifications are when the standard lens is attached.

\*3 Light source brightness automatically dims if the surrounding temperature gets too high. (Approximately 35° C at an altitude of 0 to 2,286 m, and approximately 30° C at an altitude of 2,287 to 3,048 m; however, this may vary depending on the surrounding environment.)

\*4 All average values for this product at time of shipping comply with the ISO 21118 international standards.

This product is also designed for IT power distribution system with phase-to-phase voltage 230V.

## Available Lens Shift Adjustment Range

The ranges within which the image can be moved are shown below.

The position of the projected image cannot be moved to both the horizontal and vertical maximum values.

### When using ELPLU04/ELPLW08/ELPLW06/ELPLM09/ELPLM15/ELPLM10/ELPLM11/ELPLL08

- ① Center of lens
- ② Projected image when the lens position is moved to the home position
- ③ Maximum motion range:  $V \times 58\%$
- ④ When the horizontal direction is at the maximum value:  $V \times 33\%$

### When using ELPLX02S/ELPLX02WS/ELPLX02/ELPLX02W

- ① Center of lens
- ② Projected image when the lens position is moved to the home position

## When using ELPLU03/ELPLU03S/ELPLW05/ELPLM08

- ① Center of lens
- ② Projected image when the lens position is moved to the home position
- ③ Maximum motion range:  $V \times 18\%$
- ④ When the horizontal direction is at the maximum value:  $V \times 0\%$

External Camera ELPEC01	103 (W) × 49 (H) × 47 (D) mm	Approx. 150 g	Image sensor: CMOS Sensor size: 1/2.9 inches Resolution: 2 million pixels Frame rate: 15 fps AC Voltage: 5V (USB power supply) Power consumption (while operating): less than 1.5 W (300 mA)
Wireless LAN unit ELPAP11	24 (W) × 10 (H) × 61 (D) mm	Approx. 11 g	Electrical rating: DC 5 V, 500 mA

## ■ Projector Parts - Interface

No.	Name	Note
①	Audio Out port (Stereo mini pin jack)	Outputs audio from the current input source to an external speaker.
②	Remote port (Stereo mini pin jack)	Connects the remote control to the projector using the optional remote control cable set and inputs signals from the remote control. When the remote control is connected, the remote receiver on the projector is disabled.
③	Cable holder	Pass a commercially available cable tie through here to secure cables.
④	RS-232C port (Mini D-Sub 9-pin, male)	Use to connect an RS-232C cable to control the projector from a computer.
⑤	Service port (USB connector Type B)	This port is used for batch settings and firmware update.
⑥	USB-A port (USB connector Type A)	This port is used for batch settings and firmware update. This projector can be powered at 5 V/2 A or 5 V/ 900mA.
⑦	LAN port (RJ-45)	Use a 100Base-TX or 10Base-T network cable. To ensure proper data transmission, use a Category 5 shielded cable or better.
⑧	HDBaseT port (RJ-45)	You can use a network cable up to 100 m in length. To ensure proper data transmission, use a Category 5e STP cable or better. However, operation is not guaranteed for all input/output devices and environments. This port is compatible with HDCP2.3.
⑨	SDI In port (BNC)	Inputs video signals from SDI compatible video equipment. (EB-PQ2010B/EB-PQ2010W/CB-PQ2010B only)
	SDI Out port (BNC)	Outputs video signals input from the SDI In port to an external monitor. (EB-PQ2010B/EB-PQ2010W/CB-PQ2010B only)
⑩	HDMI2 port (HDMI)	Inputs video signals from HDMI compatible video equipment and computers. This port is compatible with HDCP2.3. (Audio is only supported by PCM)
⑪	HDMI1 In port (HDMI)	Inputs video signals from HDMI compatible video equipment and computers. This port is compatible with HDCP2.3. (Audio is only supported by PCM)
⑫	HDMI1 Out port (HDMI)	Outputs signals to an external monitor or another projector. This port is compatible with HDCP2.3.

## ■ Precautions on Installation

You can install the projector or mount it to the ceiling at any horizontal or vertical angle. There are no restrictions on the installation angle, whether it is installed vertically or horizontally.

Note the following precautions when installing the projector.

### Warning

- Do not use adhesives on the ceiling mount fixing points to prevent the screws from loosening, or use lubricants, oils, or similar substances on the projector; the projector case may crack causing it to fall from its ceiling mount. This could cause serious injury to anyone under the ceiling mount and could damage the projector.
- Do not install the projector in a location subject to high levels of dust or humidity, or in a location subject to smoke or steam. Otherwise, it could cause a fire or electric shock to occur. The projector's case could also deteriorate and be damaged causing the projector to fall from the mount.

#### Examples of environments that could cause the projector to fall due to case deterioration

- Locations subject to excessive smoke or airborne oil particles, such as factories or kitchens
- Locations containing volatile solvents or chemicals, such as factories or laboratories
- Locations where the projector could be subjected to detergents or chemicals, such as factories or kitchens
- Locations in which aroma oils are often used, such as relaxation rooms
- Near devices that produce excessive smoke, airborne oil particles, or foam at events

### Caution

- Use M6 screws (up to a depth of 14 mm) to fix the projector's ceiling mount fixing points and the mounting hardware at four points.

- Do not stack projectors directly on top of each other.

## Installation space

### Caution

- Be sure to leave the following amount of space around the projector so as not to block the air exhaust and intake vents.

- Do not install the projector in a location that does not allow air to circulate, such as on a shelf or in a box. If you want to install the projector on a shelf or in an enclosure, contact Epson for more details.
- If there is not enough space around the projector and the internal temperature of the projector increases, the brightness of the light source may decrease. Make sure hot air from the exhaust vent does not go into the air intake vent.

## Installation space (When installing multiple projectors side by side)

### Caution

- If you are installing multiple projectors next to each other, make sure hot air from the exhaust vent does not go into the air intake vent of another projector.

- If you use a partition, you can narrow the space between the projectors.

## Installation space (When installing the optional external air filter)

### Caution

If you are installing the optional external air filter to your projector, be sure to leave the following amount of space around the projector.

If there is not enough space around the projector and the internal temperature of the projector increases, the brightness of the light source may decrease.

Make sure hot air from the exhaust vent does not go into the air intake vent.

## ■ Screen Size and Projection Distance

Check the tables in these sections to determine how far to place the projector from the screen based on the size of the projected image.

### Projection distance formula

- ① Screen size (inches)
- ② Screen size (Width  $\times$  Height) (cm)
- ③ Projection distance (Minimum: Wide to Maximum: Tele) (cm)
- ④ Distance from the center of the lens to the bottom of the screen (cm)

# Projection Distance

The projection distances are approximate values.

Detailed projection simulations are available on our Web site. Please use them, as needed.

<https://www.epson.jp/products/bizprojector/simulator/>

- ① Screen size (inches)
- ② Screen size (Width × Height) (cm)
- ③ Projection distance (Minimum: Wide to Maximum: Tele) (cm)
- ④ Distance from the center of the lens to the bottom of the screen (cm)

When you project an over 500 inches image, the image may become a little bit blurred.

## ■ Remote Control Operation

The remote control lets you control the projector from almost anywhere in the room.

Make sure that you aim the remote control at the projector's receivers within the distance and angles listed here.

- Depending on your installation environment, the available distance and angles may be shortened.
- Avoid using the remote control in conditions with bright fluorescent lights or in direct sunlight, or the projector may not respond to commands. If you are not going to use the remote control for a long time, remove the batteries.
- When you use multiple projectors in the same room or when there are obstacles around the remote receiver, connect the remote control to the projector using the optional remote control cable set. When the remote control is connected, the remote receiver on the projector is disabled.

## ■ Keystone Correction Range

The table here lists the adjustment range for each correction method.

### H/V-Keystone

If the projector's angle of tilt is within the following range, you can correct distortion in the projected image by using the H/V-Keystone correction function.

### Curved Surface

You can correct the image shape if the curved surface is a part of an exact circle.

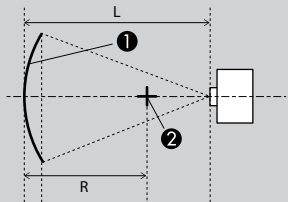

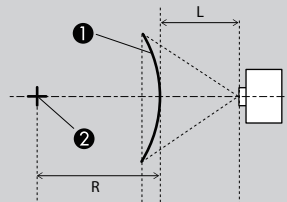

The values in the table are the minimum values for R/L in the illustration (Approximate value when projecting at maximum zoom.) If the R/L value is lower than the value in the table, you cannot correct the image shape.

You can confirm the maximum projection distance (L) using the following formula.

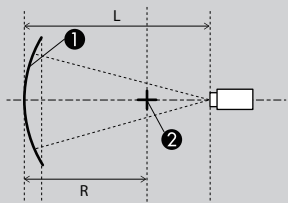

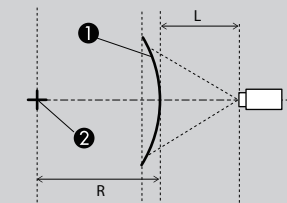

$L = R/\text{value in the table}$

## ■ Curved Surface Correction Range for Camera Assist

You can correct the image shape if the curved surface is a part of an exact circle.

The values in the table are the minimum values for R/L in the illustration They are determined in the following conditions:

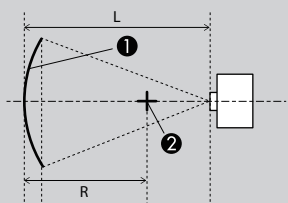

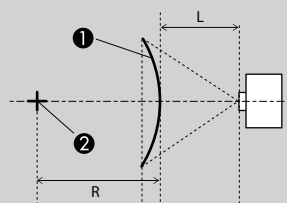

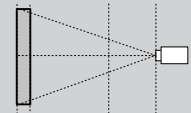

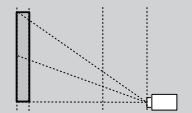

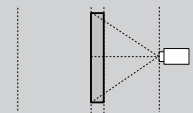

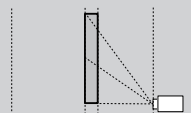

- Projecting at maximum zoom
- R is 280 cm or more
- Projecting a 150 inch image per one projector

You may not be able to correct the image shape if the value is lower than the R/L value in the table.

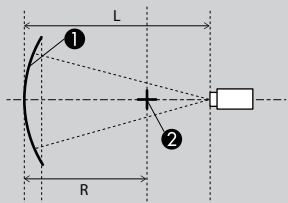

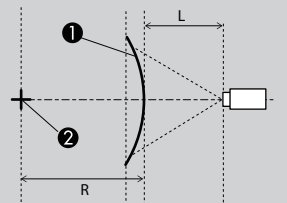

You can confirm the maximum projection distance (L) using the following formula.

$L = R/\text{value in the table}$

## ■ Monitoring and Controlling the Projector

Check these sections to monitor and control the projector over a network.

Method	Details
Epson Projector Management	Allows you to control and monitor multiple Epson projectors on a network. You can download Epson Projector Management from the following Web site. <a href="http://epson.jp/lcp/doc/">epson.jp/lcp/doc/</a>
Epson Projector Management Connected	Projector information is managed on a cloud server, so it can be remotely monitored and controlled from any device. For more information, visit the following Web site. <a href="https://www.projection-service.epson.com/epm-connected/">https://www.projection-service.epson.com/epm-connected/</a>
ESC/VP21 Command	When the projector is connected to a computer with an RS-232C cable, you can control the projector with communication commands.
ESC/VP.net Command	You can monitor the projector using ESC/VP.net commands.
Epson Web Control	By using the Web browser of a computer connected to the projector on a network, you can set the projector's functions and control the projector.
Web API	You can control the projector using Web API communication using API authentication (Digest authentication). For details, see "Web API Specifications for Projectors" on the following Web site. <a href="http://epson.jp/lcp/doc/">epson.jp/lcp/doc/</a>
SNMP	Network administrators can install SNMP (Simple Network Management Protocol) software on network computers so they can monitor projectors. This projector supports SNMP agent version 1 (SNMPv1).
PJLink command	The projector complies with the PJLink Class2 standard established by the JBMIA. From a computer connected to the projector on a network, you can control the projector with PJLink commands. For more details on PJLink, see the following Web site. <a href="http://pjlink.jbmia.or.jp/">http://pjlink.jbmia.or.jp/</a>
Art-Net command	Art-Net is an Ethernet communication protocol based on the TCP/IP protocol. You can control the projector by using a DMX controller or an application system.
sACN	An Ethernet communication protocol based on the TCP/IP protocol. You can control the projector by using a DMX controller or an application system. sACN communicates using the multicast method.
Crestron Connected	If you are using a Crestron Connected network monitoring and control system, you can set up your projector for use on the system. For additional information on Crestron Connected, visit the Crestron Web site. <a href="https://www.crestron.com/">https://www.crestron.com/</a>

## ■ ESC/VP21 Command List

When a command is input, the projector executes the command and returns a ":" (3Ah), and then accepts the next command.

If the command being processed terminates abnormally, an error message is output and a ":" is returned.

The following list shows the frequently used commands.

You can check all available commands in the ESC/VP21 Command List.

Contact Epson for more details.

## ■ Cable Layouts

### Serial connection

- Connector shape: D-Sub 9-pin (male)
- Projector input port name: RS-232C
- Cable type: Crossover (null modem) cable

In the following illustration, the projector side is shown on the left, and the computer side on the right:

Signal name	Function
GND	Signal wire ground
TD	Transmit data
RD	Receive data

### Communications protocol

- Default baud rate setting: 9,600 bps
- Data length: 8 bit
- Parity: None
- Stop-bit: 1 bit
- Flow control: None
